

## SRS for Remote Delivery

A student response system (SRS) allows an instructor to ask a question or series of questions, gather students' responses, and create a visual representation. Use of SRS's has been found to improve student performance, engagement and attendance, particularly when paired with other active learning strategies like peer instruction.

Name	Description	Costs	Synchronous or Asynchronous
<a href="#">iClicker Cloud</a> (Reef Instructor)	Similar to iClicker Classic (remotes), iClicker Cloud allows students to respond using their mobile device or laptop.
